

ANZIC MASTERCLASS

ANZIC MARINE GEOSCIENCE MASTERCLASS

SOUTH COAST NSW AND SYDNEY
4-12 DECEMBER, 2022

Hosted by

MACQUARIE
University

THE UNIVERSITY OF
SYDNEY

The scientific ocean drilling programs (IODP, ODP, DSDP) have proven to be the most successful internationally collaborative research programs in the history of the Earth Sciences.

The ANZIC Masterclass aims to introduce high achieving undergraduate students to specialist techniques and unique opportunities to prepare them for future participation in IODP expeditions and activities. Up to 30 students are selected by member institutions to attend the weeklong annual Masterclass.

The ANZIC Masterclass will be hosted by Macquarie University and the University of Sydney and will be based at Sydney Institute of Marine Science (SIMS) and include marine and geological fieldwork. You will be exposed to many ANZIC scientists as well be a part of an Australian and New Zealand wide cohort. Fieldwork will be from Batemans Bay to the Illawarra on the South Coast, with a visit to the Londonderry core store.
